mantegna

studio oils

Mantegna Studio grade oil paints have all the working characteristics similar to professional artist oils, but with lower pigment concentrations, less expensive formulas, and a smaller range of colors. These vibrant and intense colours resist yellowing and feature excellent lightfastness, guaranteeing the colours stay powerful and brilliant over time. The buttery texture allows smooth brushwork in thick application or glazing. The 56 colours in this line are formulated with no compromise of quality. Perfect for those who use a lot of paint or are looking for a good oil colour for educational purposes.

rembrandt artists' oil colours

Used by artists the world over, these paints set the standard for professional materials with their wide range of colours, their reliability, and unsurpassed quality. Rembrandt Oils contain only the finest and most lightfast pigments and the purest quality linseed or safflower oil. Each colour contains the highest amount of pigment, which is extremely fine-ground on a triple-roll mill. This means all colours in the range have excellent intensity and brilliance. You will find both traditional and contemporary tones, including professional specialities like the cobalt and cadmium colours, the new permanent yellows and reds, the modern metal colours and highly transparent glaze colours. 120 colours.

winsor & newton artists' oils

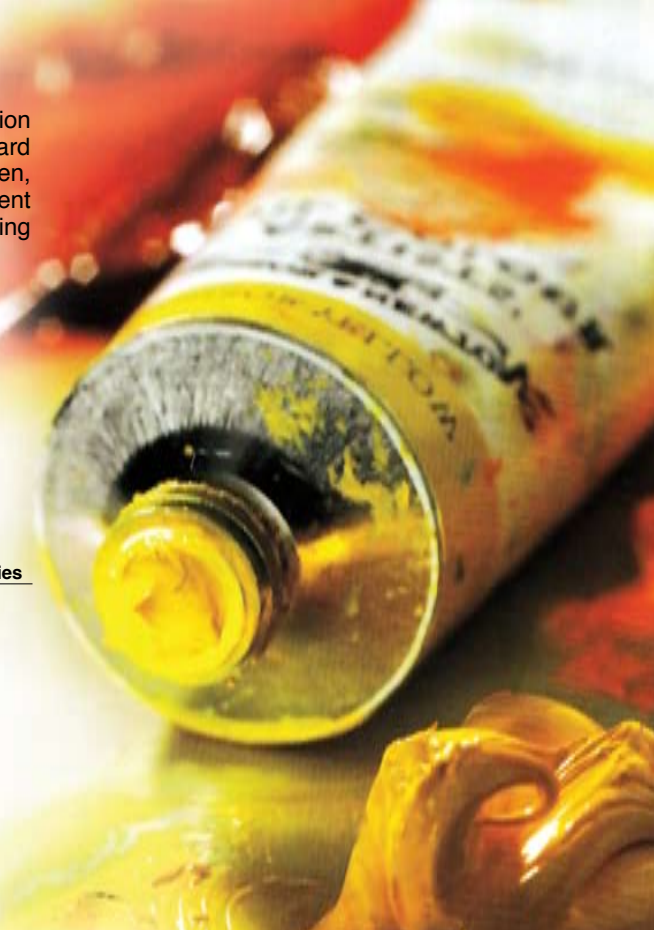

Winsor & Newton Artists' Oils owe their reputation for supreme quality to the careful selection of the very finest pigments. To produce colours of reliable consistency and a high standard of colour matching demands a combination of the traditional crafts of the artists' colourmen, and modern colour technology skills. All colours in this range contain the maximum pigment content consistent with good handling qualities, and achieves the highest possible tinting strength when reduced with white. 158 colours.

gamblin artists' oil colours

Gamblin Artists' Colours are made by painters who understand the medium. Only pure pigments and the finest refined linseed oil are used. Because no adulterants are used, each oil colour retains unique characteristics of the pigments, including tinting strength, undertone and texture. The company was established in 1980 to make artist's grade colours of exceptional quality in North America. 88 colours.

old holland classic oil colour

Old Holland describes their oil colour as “classic” rather than “artist’s quality”, because this paint is in a class of its own. These oil paints are still manufactured according to 16th century methods. The colours are ground with stone rollers which do not change the colour of the paint. Classic Oil Colours are packed in pewter lined lead tubes and each tube has a hand coloured label. All colours are completely lightfast with the exception of the madder lakes and cremnitz white. 167 colours.

van gogh h2oil colours

A genuine oil colour which can be thinned with water. No need to use expensive mediums or toxic solvents for mixing or clean up, but delivers the look, texture, and intensity of traditional oils. H2Oils dry in a fraction of the time, but still allow traditional oil techniques such as wet-in-wet. Can be mixed with traditional oils (but this will affect water clean-up). 40 colours.
