artist quality heavy body acrylics

Historically, acrylics were an alternative to oil-based paints, and therefore were designed to mimic them in appearance, consistency and performance. Now that acrylic materials have secured a place for themselves in the modern art world, they are no longer limited to that format. Mantegna Artists' Acrylic colours are heavy-bodied, paste-like colours that hold a great deal of texture and detail and are easy to manipulate with anything from a very soft brush to a rigid palette knife. Because of their mass, these thick colours will stay wet longer on the palette and can be used for several days if the palette is protected with an airtight seal.

Mantegna Artists' Acrylic Colours offer exceptional lightfast qualities, good handling properties, superior pigment strength with no added fillers, extenders, or opacifiers, guaranteeing maximum colour saturation.

The pigments selected for the manufacture of the 102 Mantegna Artists' Acrylic Colours are of the highest quality. The thick, buttery consistency of the Mantegna Artists' Acrylic colours allows the artist to create bold, crisp impasto effects normally associated with artist's oil colours.

special features

Mantegna offers a traditional and modern pigment selection that includes 6 iridescent colours, 6 interference colours and a very useful neutral gray.

Interference Colours - create an effect of shifting hue with motion and light, seen every day in nature and technology, from cars, fabrics, an oil slick, or butterfly wings. With Mantegna Interference colours, you can apply that same radiance to your paintings. Interference pigments are a combination of mica particles coated with titanium dioxide. The thinly laminated mica platelets refract 2 separate light wavelengths.

Iridescent Colours - Shiny, opulent, and very rich looking, the iridescent acrylic palette paints with the ease of warm butter and have the patina of metal. They can be used to simulate metal, or provide depth to a translucent glaze or reflective backdrop.

man·te·gna (män te´nyä)

n : Andrea Mantegna (1431 - 1506), a well known 15th century Italian painter and engraver is noted for his stunning ceiling frescoes. His work is characterized by classical elements and shows a strong influence by Donatello.

Mantegna is credited with the introduction of spatial illusionism.

the difference between artist and studio grade acrylics

There are many misconceptions about the limitations of student or bargain quality acrylics. Artist-grade acrylics are the top of the line paints, while student acrylics are designed to be an economical alternative. Artists' acrylics have a much higher pigment load, finer quality raw materials and contain little or no fillers. The pigment is present in a very large quantity in artist-grade acrylics. This means you get more colour for your dollar. The more pigment there is, the further you can stretch your colours. Student and craft paints can offer the same handling characteristics as their high-end counterparts, without all the bells and whistles. They also have a tendency to appear more matte when dry.

studio acrylics

While less expensive than the Mantegna Artists' Acrylic Colours, this paint line offers 38 vibrant, dependable colours at an economical price featuring premium quality non-fading pigments to ensure that artwork will last for years. The Mantegna Studio Acrylic Colours working characteristics are similar to the professional acrylic colours but have lower pigment concentrations, less expensive formulas, and a smaller range of colours.

Mantegna Studio Acrylics can be used for impasto, wash, and can be poured or moulded and are permanent when dry. The 38 colours are intermixable and are great for the classroom and for colour theory study.

what are fluid acrylics?

The natural state of the acrylic polymer emulsion is a liquid one. Liquid acrylics therefore are the “purest” form of acrylic paints. Brimming with pigment, they can be splattered, swished, or dripped onto your painting. The flow of liquid acrylics allows for more control and longer brush strokes. Painting long, flat, uniform strokes of colour is one of the strengths of this format. The common conception that liquid acrylics are a diluted form of the high viscosity paints is wrong. At the artist-quality level, liquid acrylics have the same pigment load as their high-viscosity counterparts. Liquid colours are pourable and have enough body to achieve soft textures and show brush strokes.

fluid acrylics

Mantegna Fluid Acrylics are wonderfully versatile, professional quality liquid acrylic colors with the consistency of heavy cream.

Highly pigmented, their excellent tinting strength produces strong color even when mixed with acrylic medium or when thinned with water for staining effects. This allows the artist to create surfaces from heavy impasto to thin glazes without having to break down the thick binder that is in Heavy Body Artist Acrylic Paints.

Mantegna Fluid Acrylics come in 98 brilliant colours and are lightfast, durable, and flexible, with good adhesion. They're a must have for any acrylic painter.

acrylic mediums

Mediums are a growing and integral part of the acrylic system. Acrylic mediums form the backbone of acrylic painting technique and provide the artist with the vehicle needed to achieve an endless variety of effects.

acrylic gesso fine, medium and coarse

100% Acrylic Gessos offer the artist a range of options for their priming needs with superior saturation, covering power and flexibility. These gessos dry to a semi-gloss finish, can be applied to a variety of surfaces such as paper, canvas, wood, fabric and ceramics and can easily be sanded to obtain smoother ground. Mantegna Acrylic Gessos will improve the expansion and performance of the acrylic paint, while ensuring a long, brilliant life-span and can be used directly or may be diluted with water.

Acrylic Gesso (FINE)

Acrylic Gesso (MEDIUM)

Acrylic Gesso (COARSE)

matte gel medium

Matte Gel Medium will reduce the gloss of the acrylic paint, while maintaining viscosity and strength. It effectively binds the paint with the painting surface and increases durability. Matte Gel Medium is great as the last layer of your painting and dries to a satin finish. This product can also be diluted with water.

Item#	Description	List/ea.
GM-02001	Matte Gel Medium; 60ml	4.50
GM-02052	Matte Gel Medium; 500ml	21.10
GM-02102	Matte Gel Medium; 1000ml	40.15
GM-02202	Matte Gel Medium; 2000ml	76.25
GM-02502	Matte Gel Medium; 5000ml	190.60

Gloss Gel Medium

gloss gel medium

Gloss Gel Medium is formulated without pigment and can be added to Mantegna Acrylics in order to create viscosity, without negatively affecting the saturation of the colours. When mixed with acrylic paint, the gel enhances the glossiness of the top colour layer as well as prolonging the drying time. It can be used as a polish on the final layer and won't leave brush or palette knife traces. Gloss Gel Medium will dry to a highly transparent, glossy finish and can be diluted with water.

Item#	Description	List/ea.
GM-02002	Gloss Gel Medium; 60ml	4.50
GM-02051	Gloss Gel Medium; 500ml	21.10
GM-02101	Gloss Gel Medium; 1000ml	40.15
GM-02201	Gloss Gel Medium; 2000ml	76.25
GM-02501	Gloss Gel Medium; 5000ml	190.60

Matte Gel Medium

Gloss SH Gel Medium

gloss heavy gel medium

Glossy Super Heavy Gel Medium is the most viscous of the Mantegna mediums and is formulated without pigment so that it can be mixed with Mantegna Acrylics to create depth and hold extreme texture in a painting. It can also be combined with Modelling Paste to create a smooth, durable surface, which won't crack over time. Gloss Super Heavy Gel Medium will dry transparent with a smooth and even surface. It can also be used as an adhesive for collage or diluted with water.

Item#	Description	List/ea.
GM-02003	Gloss H Gel Medium; 60ml	4.50
GM-02053	Gloss H Gel Medium; 500ml	21.10
GM-02103	Gloss H Gel Medium; 1000ml	40.15
GM-02203	Gloss H Gel Medium; 2000ml	76.25
GM-02503	Gloss H Gel Medium; 5000ml	190.60

Matte SH Gel Medium

matte heavy gel medium

Matte Super Heavy Gel Medium, a highly viscous, opaque gel formulated without pigment, allowing the artist to incorporate dramatic depth and texture into their painting. It can be used in any proportions with Mantegna acrylic paints. The acrylic paint mixed with Matte Super Heavy Gel Medium will dry to a very opaque, dense and flexible finish. The ratio of the gel medium to acrylic pigment can be experimented with, allowing for higher translucency and greater viscosity. This product can also be diluted with water.

Item#	Description	List/ea.
GM-02005	Matte H Gel Medium; 60ml	4.50
GM-02055	Matte H Gel Medium; 500ml	21.10
GM-02105	Matte H Gel Medium; 1000ml	40.15
GM-02205	Matte H Gel Medium; 2000ml	76.25
GM-02505	Matte H Gel Medium; 5000ml	190.60

acrylic polymer gloss medium (final coat)

Acrylic Gloss Medium is used to mix colours and dilute acrylic paints. When mixed, the paint become more lustrous and transparent and enhances the paints adherence and endurance. Acrylic Gloss Medium can be mixed with Mantegna acrylic colours during the artistic process, or can be applied as the final coat.

Item#	Description	List/ea.
G-570250	Acrylic Gloss Medium; 250ml	7.45
G-570500	Acrylic Gloss Medium; 500ml	14.10
G-571000	Acrylic Gloss Medium; 1000ml	26.75
G-572000	Acrylic Gloss Medium; 2000ml	50.85
G-575000	Acrylic Gloss Medium; 5000ml	126.95

gloss polymer medium

Gloss medium can be combined with Mantegna Acrylic paints to dramatically increase the glossiness of the paint. It can be applied with a brush as a final coat, or mixed in with the paint during the creative process and can be diluted with water. Gloss medium dries to a clear, even, and glossy finish.

Item#	Description	List/ea.
GM611-250	Gloss Medium; 250ml	10.15
GM611-500	Gloss Medium; 500ml	16.05
GM611-1000	Gloss Medium; 1000ml	24.50

matte polymer medium

Matte medium can be combined with Mantegna Acrylic paints to produce a matte and toothy finish. It can be applied with a brush as a final coat, or mixed in with the paint during the creative process and can be diluted with water. Matte medium dries to a clear and even finish.

Item#	Description	List/ea.
GM612-250	Matte Medium; 250ml	10.15
GM612-500	Matte Medium; 500ml	16.05
GM612-1000	Matte Medium; 1000ml	24.50

acrylic retarding medium

Acrylic Retarding Medium is designed to slow down the drying time of acrylic paints. This gives the artist a longer "open-time" in which they can manipulate paint. It can be used with Mantegna acrylic paints and won't change the fundamental characteristics of the pigments. Acrylic Retarding Medium allows the paint to dry to a smooth, even and glossy finish and can be used for broad surface areas or for detailed work.

Item#	Description	List/ea.
GM616-250	Acrylic Retarding Medium; 250ml	10.15
GM616-500	Acrylic Retarding Medium; 500ml	16.05
GM616-1000	Acrylic Retarding Medium; 1000ml	24.50

modeling paste

Made of natural sand, plaster and lava, modeling paste is an indispensable material for producing three-dimensional effects, and creating dramatic peaks and textures in your painting. Mantegna modeling paste is available in four types:

HEAVY modeling paste is made of tiny particles with heavy density and can create smooth, delicate, yet heavy textures.

LIGHT modeling paste is made of light density materials and can achieve a light texture effect. It is suitable for large paintings.

SHARP is delicate and produces sharp boundaries and peaks in your painting.

EXOTIC modeling paste is made of rough particles and it is an ideal material to produce rough textures.

gloss varnish

This medium uses a water-based acrylic resin as its base. After the paint has dried, apply Gloss Varnish to create a lasting gloss with high transparency. It will prevent damage to the painting by light and moisture, as well as protect the painting from pollution. Gloss Varnish Solvent is easy to handle, boasting all merits of acrylic resin an offensive odor.

Item#	Description	List/ea.
GM614-250	Gloss Varnish Solvent; 250ml	17.25
GM614-500	Gloss Varnish Solvent; 500ml	27.70
GM614-1000	Gloss Varnish Solvent; 1000ml	44.25

crystal varnish

Goes on clear, stays on clear, and provides a durable finish to protect your paintings. Crystal Varnish is a tough, crystal clear finish that won't yellow with age and adds luster. Permanent, water resistant and quick drying.

Item#	Description	List/ea.
G-590250	Crystal Varnish; 250ml	17.25
G-590500	Crystal Varnish; 500ml	27.70
G-591000	Crystal Varnish; 1000ml	44.25
G-592000	Crystal Varnish; 2000ml	70.80
G-595000	Crystal Varnish; 5000ml	177.00

painting size

Painting Size acts as a primer for painting on unconventional surfaces. It transforms porous materials into a surface ready to be painted on. It can be applied to cloth, board, and paper, and protects the material from the effects of water and oil. Painting size also protects your artwork by preventing acid erosion and increases the durability of the material.

Item#	Description	List/ea.
G-580250	Painting Size; 250ml	10.15
G-580500	Painting Size; 500ml	16.05
G-581000	Painting Size; 1000ml	24.50
G-582000	Painting Size; 2000ml	39.20
G-585000	Painting Size; 5000ml	98.00

painting solvent

Painting Solvent can be used to dilute acrylic paint, control its drying time, and increase adhesion. These qualities make this the best medium for airbrush painting.

Item#	Description	List/ea.
GM615-250	Painting Solvent; 250ml	10.15
GM615-500	Painting Solvent; 500ml	16.05
GM615-1000	Painting Solvent; 1000ml	24.50

studio acrylic gesso

Specially formulated to mix with the Mantegna Studio Acrylics line, this gesso will improve the expansion and performance of the acrylic paint, while ensuring a long, brilliant life span and can be used directly or may be diluted with water.

Item#	Description	List/ea.
SG-120250	Studio Acrylic Gesso; 250ml	6.10
SG-120500	Studio Acrylic Gesso; 500ml	7.85
SG-121000	Studio Acrylic Gesso; 1000ml	15.35
SG-122000	Studio Acrylic Gesso; 2000ml	30.00
SG-125000	Studio Acrylic Gesso; 5000ml	75.00

studio modeling paste

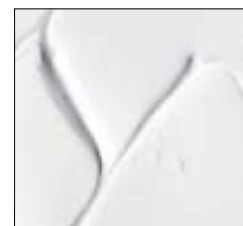

Specially formulated to mix with the Mantegna Studio Acrylics line, and made of natural sand, plaster and lava, modeling paste is an indispensable material for producing three-dimensional dramatic effects and textures in your painting.

Item#	Description	List/ea.
SC-220250	Studio Modelling Paste; 250ml	9.75
SC-220500	Studio Modelling Paste; 500ml	12.45
SC-221000	Studio Modelling Paste; 1000ml	24.40
SC-222000	Studio Modelling Paste; 2000ml	47.80
SC-225000	Studio Modelling Paste; 5000ml	119.40

studio gel medium

Specially formulated to mix with Mantegna Studio Acrylics, this Gel Medium effectively binds the paint with the painting surface and increases durability. Works great as the last layer of your painting and dries to a satin finish. This product can also be diluted with water.

Item#	Description	List/ea.
SM-320250	Studio Gel Medium; 250ml	10.30
SM-320500	Studio Gel Medium; 500ml	13.15
SM-321000	Studio Gel Medium; 1000ml	25.80
SM-322000	Studio Gel Medium; 2000ml	50.55
SM-325000	Studio Gel Medium; 5000ml	126.40
